Brief explanation of any of the figures reported above necessary to enable the figures to be understood:

Revenue increased in the period primarily due to:

- Additional revenue from customers in the resources sector as maintenance activity on mine sites has increased;
- Incremental revenue earned in the period from new contracts won in the prior year;
- New revenue from major projects completed and commenced in the period:
 - o Olympic Dam shutdown – completed in the period;
 - o Kiata wind farm – completed in the period; and
 - o Yaloak and Mount Gellibrand wind farms – commenced in the period.
- Labour hire service added new external revenue during the period.

This improved performance was supported by the movement of assets to the East Coast following the closure of an unprofitable depot in Western Australia in the second half of FY17.

The increased revenue was delivered from the existing overhead structure and did not require any significant additional overhead cost. This was reflected in increased operating margins and profitability recorded in the period.

The prior period net profit included a non-cash asset impairment of \$1.9 million. No asset impairments were considered necessary in the current year.

Further commentary on the results for the reporting period are contained in the ASX Release and the Market Presentation both dated 20 February 2018.
