

BOOM

About Us

Boom Logistics (ASX:BOL) provides lifting solutions for projects of all sizes; whether it be a short-term requirement or a major contract, BOOM can adapt to meet your needs. Our large fleet of cranes, ranging from 20t to 750t, specialised heavy haulage vehicles and travel towers, ranging from 8m to 70m, reinforce BOOM's capacity and capability to provide innovative lifting solutions.

As Australia's leading industrial services provider, BOOM supplies specialist project management,

key engineering, construction and installation services, planned and unplanned mechanical and electrical maintenance for the Wind, Energy, Utilities, Infrastructure, Resources and Telecommunications sectors across Australia.

We see every project as an opportunity to innovate and find better ways of doing things, saving money and time. Our promise is to deliver above customer expectations every day with exceptional service and skill.

"We deliver safe lifting solutions, with scale and precision, every time. Managing risk and complexity with confidence - that's the promise we make to our customers"

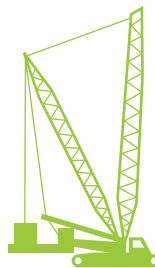

ASSET SNAPSHOT

14 depots
across Australia

100 travel towers
all sizes up to 70m

250 cranes
ranging from 20t up to 750t

1,100 Employees
400 permanent, 700 flexible

OUR VALUES

The BOOM values are the uncompromising foundation of our organisation, guiding our decisions, our behaviours and the way we do business.

Our purpose

To safely and profitably grow our business through the provision of innovative customer lifting solutions and specialised labour hire services in the markets we serve to deliver returns and value to our shareholders.

Our vision

To be recognised as an industry leader in lifting and industrial services to the Australian market.

Safety and Quality Systems

Caring for the health and safety of our people and minimising our impact on the environment and the community is a core value that drives every one of our activities and decisions, and is consistent with our safety vision. Our ultimate goal is to achieve injury and incident free work sites.

We are committed to providing and maintaining a safe working environment for all stakeholders. Our goal is to be a zero harm organisation. At BOOM we believe that safety is everyone's responsibility and we all work together to eliminate or minimise hazards and injuries from the workplace

Our National integrated health, safety, environment, and quality (HSEQ) management systems, ensure a company-wide focus on best practice and comply with all state and federal legislative

requirements. We ensure that you receive safe and reliable equipment and minimise any unforeseen project downtime.

Additionally, all our equipment is maintained and serviced according to OEM specifications and any legislative requirements for the safety of your team and ours, and to ensure that your projects remain on track without interruption.

BOOM will provide access to all customers to Audit our safety systems upon request and are certified to ISO45001 and ISO9001.

"Recognised by our customers, employees, communities and shareholders as the supplier of high value lifting solutions without injury"

Operational Capability

BOOM brings a wealth of experience to field construction execution including; engineering, heavy lift, industrial relations, mobilisation, mechanical and electrical, and project management. We deliver the full package of engineering know-how, specialised lifting equipment and multi-skilled teams required to tackle large scale and complex elements of plant and infrastructure, construction and maintenance.

Our experienced, handpicked teams understand our clients' challenges

and will work with you to optimise your project and offer cost saving suggestions. We are committed to collaborating with our customers to ensure seamless integration with our multi-skilled workforce and project management teams.

Permits and Licenses: Each project and location may have different permitting requirements and BOOM will assist to obtain necessary permits specific to project requirements and local and state regulations.

"Our people have extensive knowledge and understanding of major project requirements and will work closely with your team to ensure we provide a safe engineered solution"

Infrastructure

From roads and highways to rail bridges and telecommunication towers, our team has been responsible for the safe and successful delivery of some of Australia's largest and most challenging high profile projects.

As exciting as it is to deliver major infrastructure projects, we are just as committed to our work on smaller, yet equally rewarding projects. We aim to partner at every opportunity and never stop looking for ways to add more value to our customers.

Our approach is to challenge the traditional way of thinking and push for smarter and more efficient ways to deliver our service, whilst always working with the highest level of safety standards on every project.

BOOM is proud to be an industry leader across this sector and to be recognised as a trusted partner for safety performance with a dedicated management team.

BOOM has successfully completed projects in the following market segments:

- Road
- Rail
- Utilities
- Renewables

Our crane fleet includes:

- LTM1750-9.1 – 750t All Terrain
- LTM1500-8.1 – 500t All Terrain
- LR1750 – 750t Crawler
- LG1750 (SX) – 750t Lattice Truck

“Our service delivery is based on the right equipment, our operational expertise and our safety & quality systems”

Mining and Resources & Industrial Maintenance

BOOM serves customers from a range of sectors in the mining and resources market with the provision of lifting services and engineering capabilities. These services include heavy lift projects coupled with fit for purpose assets, engineered lift designs, onsite management, speciality labour services, scheduling and facilities maintenance requirements.

A profitable mine site requires its Industrial Service provider to make smart decisions about health and safety, asset allocation, resources and project execution. We have been entrusted to carry out key maintenance & shutdown projects from some of Australia's largest miners.

Our services are tailored to meet the unique requirements of our mining customers and cover the full range of maintenance requirements including:

- Onsite crane lifting requirements.
- Skilled crane supervisors, operators and maintenance staff.
- Engineering expertise and capabilities.
- Planned and efficient shutdown programs.
- Emergency works on unexpected breakdowns.
- Scheduled maintenance programs on equipment.

"Proudly recognised as a key service provider to the Mining and Resource sector for more than 18 years"

Energy, Utilities, Renewables

BOOM has more than a decade of experience in this challenging sector and has successfully assisted with the delivery of major transmission line and energy distribution projects. We understand the critical importance of our work and we are focused on minimising any downtime and optimising operational efficiencies.

Maintaining energy assets is crucial for the distribution and supply of electricity right across Australia. We provide a model that supports maintenance needs, and, major and minor capital works programs such as installations of substations, lattice towers, poles and wires in both low and high voltage works.

Critical networks must be reliable, and your construction projects need to meet key completion dates. We have successfully facilitated the delivery of major transmission lines and energy distribution projects and wind farm construction and maintenance.

BOOM offers a wide range of services for owners and principal contractors to drive operating efficiencies, cost savings and safety, while assuring the ongoing reliability and value of the telecommunication or utility assets. Depending on your specific project requirements, our in-house engineering team will help optimise your project with preplanning on Balance of Plant (BOP) site component logistics and installation optimisation.

"We have a proven track record of delivering critical infrastructure projects"

Diversity and Inclusion

BOOM strives to seek out and retain the finest talent whilst upholding our value of treating all people with respect. We recognise that the diversity within our workforce and the broad range of skills our employees bring are what makes BOOM strong.

BOOM maximises opportunities for underrepresented groups, including but not limited to indigenous workers, displaced workers, culturally and linguistically diverse people, women, youth, unemployed and mature age workers. We are an equal opportunities employer and aim to uphold BOOM's value of diversity and commitment to the Indigenous communities.

BOOM's Indigenous Framework outlines the company's strategy for generating work opportunities and employment outcomes for Indigenous people. The Indigenous Framework is designed to ensure that Boom Logistics' approach is consistent, transparent and equitable.

More information regarding Boom Logistics Indigenous Employment Framework is available on our website.

"BOOM acknowledges the Ghungalou Nation people, who are the traditional owners of the land which we work in. We are pleased to announce, out of respect of their elders past and present, we name our 300 tonne crane in their honour, Ghungalou."
